

**OCTOBER 18~NOVEMBER 8, 2008**

## **Proposed routing**

**Distances are point to point relative approximations  
Stops and wayward deviations have not been included.**

**Flexibility is the key and the intended routing will be announced daily. Please provide your own maps. There will be no handouts.**

**Obviously, weather, road conditions and breakdowns will affect the 21 day schedule. There is a one day grace period within the October 18 to November 8 time frame which is actually 22 days.**

**End of day destination is not firm.  
Accommodations may be within 30 miles.**

**There are various degrees of receptions in some communities' of our re-enactment of Schuster's 1908 route and these may still be in the planning stage.**

**The routing for the most part avoids freeways and toll roads.  
This will not be possible on all parts of the route, e.g. Wyoming & I-80.**

**George Schuster's waypoints are in BOLD.  
103 have been identified and labeled and undoubtedly we will pass through many which may not have been designated as waypoints.**
